# UNIVERSE IN ONE PASSAGE

SPACE IS NOT EMPTY OR NOTHING . IT IS MADE UP OF A FUNDAMENTAL PARTICLE KNOWN AS ‘SHAKTI” OR “ENERGY” .THIS ENERGY IS ABLE TO REPRODUCE MORE ENERGY USING “TIME” AS A FUEL. ENERGY IS GROWING AT VERY FAST RATE OVER TIME. HENCE , SPACE IS EXPANDING AT ACCELERATED SPEED. THEREFORE , WE OBSERVE INCREASE IN DISTANCE OF SOME FAR OBJECT OVERTIME WHOSE GRAVITY DOES NOT COLLIDE WITH EACH OTHER. BECAUSE SPACE BETWEEN THEM IS INCREASING DUE TO COURSE OF TIME.

NOW WE KNOW FUNDAMENTAL OF SPACE AND TIME AND CAN PROCEED FURTHER ABOUT MASS AND GRAVITY.

MASS IS CONCENTRATION OF SPACE IN SMALL AREA , CONCENTRATION OF SAME ENERGY WHICH MAKES SPACE AS WE TALKED ABOVE. HIGHER THE CONCENTRATION ,HIGHER IT’S MASS WILL BE. AND THIS DEPOSITION OF ENERGY CREATE A LOW PRESSURE OF ENERGY AROUND THE MASS. THIS LOW PRESSURE KNOWN AS GRAVITY . HENCE, ALL THE MASS IS A ATTRACTED TOWARD THIS LOW PRESSURE OF SPACE.

NOTE:- HERE ENERGY IS SHAKTI AND TIME IS KAAL.
